

# LABINO® Variable Friction Arm

FLEXIBLE • FITS ALL LABINO LAMPS • EASY-TO-USE • LOW WEIGHT

*Labino Variable Friction Arm & UV Floodlight PS 135, mounted with clamp*

*Labino Variable Friction Arm & UV Floodlight PS 135, mounted on base*

## THE LABINO VARIABLE FRICTION ARM

A high quality, flexible and easy-to-use support system that fits all our products. The system is suitable for many different applications including Non-Destructive Testing, UV-Curing, etc, giving the operator freedom of movement.

Articulated arm with large locking knob. Variable friction and locking of all three movements is obtained by adjusting the knob. Comes with two adjustable *Clamps* for secure mounting of the lamp to the arm and the arm itself to a table or other suitable structures. A *Base* is also included for easy placing on any flat surface. Ball joints at both ends for maximum flexibility.

*Focused UV & Lighting Technology*
